NAME

Ryan J.P. Casalino

E: ryan@boringtranquility.io

P: +1917.282.7506

SYNOPSIS

I'm a programmer based in Seattle, WA. I'm largely self-taught with an unorthodox educational background. I've had experience building server-side web applications such as Rails and Django. I've also had a hand in building RESTful API backend message systems expressed in JSON. And I've written dynamic web sites using JavaScript. I have a passion for learning and I am looking for opportunities that will foster my professional growth.

TECHNICAL SKILLS

Programming languages I know:

- **Go** - 2 years
- **Python** - 3 years
- **JavaScript** - 4 years
- **Ruby** - 1.5 year

Tools Experience:

Databases (*MySQL, PostgreSQL, MongoDB,*) Cloud Providers (*AWS, Heroku*), Operating Systems (*FreeBSD, Linux, macOS, Windows*), Virtualization (*Docker, minikube, VirtualBox*), web servers (*nginx, Apache*). My daily editor is *vim,* my go-to OS is *NixOS.* I self-host my personal websites and build them with a custom written static site generator.

EDUCATION

School of the Art Institute of Chicago - BFA, 2011
